

Press Release

Symposium for Industrial IT + Digitalization

ISD TRANSFORUM - Symposium for Industrial IT + Digitalization on the 19th of October in Ludwigshafen

Ludwigshafen, 3rd of August 2017 - on the 19th of October 2017 the second ISD TRANSFORUM takes place - in the Startup-innovation center "Freischwimmer" in Ludwigshafen. The subjects digital transformation, Industry 4.0 and IoT form the center of the symposium.

Symposium for Industrial IT + Digitalization

Beside presentations the ISD TRANSFORUM 2017 offers to his visitors direct contact with the expert's network of ISD, consisting of the well-chosen manufacturers who round the portfolio of ISD and ISD employees of the competence field Industrial IT. Live demos grant direct insights into concrete examples of use.

The ISD TRANSFORUM 2017 is directed at decision-maker from research [&] development, IT, logistics, production and technology in small business and enterprises, looking for answers to questions as for example: How can middle class and industry keep pace with the digitization of economy and Society? How can enterprises by digitization link up processes smartly, analyze company data efficiently and raise their productiveness?

TRANSFORUM has own website

Specially for the series of events a website was developed on which all essential information about the speakers, the exhibitors, the journey description and other subjects is to be found - as well as the registration form for the symposium.
